RE: Devo Digital Productions letter of support

Dear Mr. Dunn:

It is with great pleasure that I take this opportunity to write a letter of support for Devo Digital Productions. Because you are currently exploring production proposals, please allow me to share with you my experience with Devo.

Our program was created by a local agency, funded through a grant from the USDA, and housed at the OSU Extension office in Mahoning County, OH. This program is a first-of-its-kind and is a model program for national use. One of our 13 major tasks during our first year was to produce an environmental education video that would appeal to children K-12 and address 10 specific topics. No small task!

We received many proposals from production companies interested in this project. However, Devo's proposal stood out from the rest. The freshness of ideas, creative approach, and capable staff were apparent. We awarded Devo the contract in November of 1995 and had the pleasure of working with them through April of 1996.

Mr. Delfino and his staff made us feel comfortable in an arena of work that was unfamiliar to us. They were careful to explain to us time line and each step in the process so that we were actively involved. We established a professional relationship with respect to the roles we each played in the production process, start to finish.

From script writing, to concept formation, to talent search, to set design, we never ceased being amazed at the quality and creativity this company demonstrates. We, as well as our local, state, and federal grant officials, are thrilled with the final product. It is our hope to work with Devo Digital Productions on future projects. Without hesitation, we recommend this company with highest regard.

If you have any questions, please feel free to contact me, I would be happy to answer them.
